Final Project: Planning Document

CET2792C Install and Configure Windows Server

Final Project: Planning Document

Fill out the highlighted areas of the document. These fields will help you put together your final project. Make sure that your names match the chosen theme and have a naming convention in common. For example, if you decide that your usernames should be first initial + last name, all usernames should use this formatting.

Failure to follow instructions will result in a reduction of points. If you have any questions, please ask.

Project Information

Project Theme: _____

Domain Name: _____

Server Information - Server names must include F24 + Your Initials. e.q. TronF24JDrC

Server #1
Name: _____
Roles:
IP Address: _____
Subnet Mask:
NO Gateway
DNS (same as Server #1's IP): _____

Server #2
Name: _____
Roles:
IP Address: _____
Subnet Mask:
NO Gateway
DNS (same as Server #1's IP): _____

Server #3
Name: _____
Roles:
IP Address: _____
Subnet Mask:
NO Gateway
DNS (same as Server #1's IP): _____

All Servers
Domain Password: _____
OS: Windows Server Datacenter

ADDS Information- all objects name should include "24F" e.g. jsmith24For g_titan24F

Note: User Information should be filled out in the format of Full Name/Username

OU #1
Name: _____
Group Name: _____
User #1: _____/_____
User #2: _____/_____
User #3: _____/_____

OU #2
Name: _____
Group Name: _____
User #1: _____/_____
User #2: _____/_____
User #3: _____/_____

OU #3
Name: _____
Group Name: _____
User #1: _____/_____
User #2: _____/_____
User #3: _____/_____

Network Equipment

Switch #1 Name: _____
Switch #2 Name: _____
Router Name: _____

Client Information

Name: _____
OS: Windows 10 or 11
IP Address: DHCP

Once you are done filling out this document, go back and double-check that all the fields are filled in. Save the file as a .pdf and turn it into the Final Hands-On Project: Documentation drop box.

Wait until your documentation has been approved before moving on to the project's next step.
